# Company Profile

Established in 1990, SAMCO Pumps (Natal) (Pty) Ltd has become recognised as a valued supplier of premium quality pumps and high pressure pumping systems from some of the world's leading manufacturers. Our primary focus is delivering turnkey solutions for any and every pumping requirement. This includes pump sales, pump servicing, testing, repairs and maintenance, training, pump rentals, and installation for most applications.

We are committed to providing service excellence at all times to ensure optimal pump operations for clients throughout Southern Africa with a wide range of pump products to support the core markets of the paper and pulp, water and wastewater, fertiliser and sugar industries as well as the chemical process, food and beverage, and mining sector. In addition, SAMCO boasts modern and fully equipped workshops and service centres which constantly maintain an inventory of genuine parts to keep pumps running optimally.

Our operations are founded on the principles of service and integrity as well as providing quality through expertise and trusted service delivery. These principles are reflected in our vision, values and commitments and prescribe the standard to which we conduct business with our customers.

## Branches

Samco Pumps has offices in Durban, Richards Bay, Cape Town, Johannesburg and Port Elizabeth. This enables us to respond to the needs of our customers country wide.

## Vision

We aspire to become the largest and most trusted pump supplier in South Africa and beyond, providing lifetime solutions that extend to maintaining sustainable and optimal performing pump operations for our diverse customer base.

## Mission

Our core business is focused on the sale, rental, repair and servicing of premium quality pumps from leading international brands. These products are designed to achieve high quality and safety standards to handle a wide variety of industrial and commercial applications in the key market segments of Southern Africa.

## Values

- Integrity
- Reliability
- Trust
- Professionalism
- Excellence
- Expertise
- Honesty
- Passion
- Ethics

# Industries

SAMCO brings a broad spectrum of pumping products to the Southern African market, offering a breadth of solutions to the key industry segments that we serve.

## Water & Wastewater

SAMCO stocks a wide range of pumping solutions aimed at ensuring the safe, reliable and efficient handling and treatment of water and wastewater. SAMCO only distributes products that conform to the highest quality standards and operational proficiency.

## Fertiliser

SAMCO supplies a unique range of process pumps and specialty pump systems for the production and irrigation of nitrogen, phosphorous and potassium-based fertilizers.

## Sugar Processing

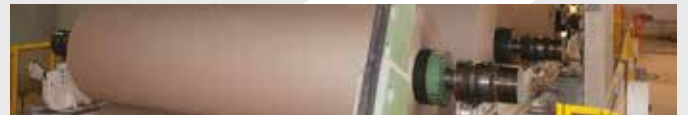

SAMCO offers a comprehensive range of robust pump systems to handle the fibrous, abrasive and corrosive nature of materials found in the sugar processing industry.

## Chemical Process

SAMCO offers a diverse range of specialized chemical pumps which meet the highest quality and safety requirements to handle the transfer of highly corrosive, high temperature chemicals and other potentially hazardous materials found in these environments.

## Pulp & Paper

SAMCO supplies a comprehensive range of robust pumps that are designed specifically to handle pulpy, corrosive and erosive media of varying consistencies, which also offers high performance characteristics to minimise problems and improve efficiencies in these critical operations.

## Mining

The world-class brands that we supply have been delivering pumps and related pumping equipment to the global mining industry for decades, employing the most advanced technology to meet the requirements of this highly demanding and hazardous industry.

## Food and Beverage

The leading pump brands that we supply have played an important role in the food and beverage industry worldwide for many years. These systems are designed to provide reliable, efficient and above all, hygienic operation to handle viscous, corrosive and temperature-sensitive ingredients in high-sanitation food processing environments.

# Products

SAMCO is a leading supplier of premium pumps from globally recognised pump brands with decades of experience and global expertise in manufacturing and supplying market-leading solutions. Through these brands, we are able to design and deliver customized pumping solutions for almost any fluid transfer application within any market segment in Southern Africa.

## SAMCO

SAMCO pumps are proudly manufactured by S.A.M. Engineering, offering heavy-duty process centrifugal pumps and customised pumping solutions with unlimited pump configurations.

# Services & Solutions

As a service-oriented company, SAMCO's core focus is on providing value-added industrial pump services, combining complete customer service, support solutions and quality products to solve the operational challenges that our clients face.

## Sales

SAMCO is fuelled by a dedicated sales team who are committed to selling a full range of pumps for all applications. We know pumps, we know systems – and we know how to combine this knowledge to provide the best solution for your needs from our diverse selection of high performance pump products manufactured by world-leading pump companies.

## Repairs & Maintenance

SAMCO has a modern and fully equipped workshop boasting the latest tools and equipment to offer fast and reliable pump repair services and maintenance solutions. We understand that the continued performance of your pumps is a high priority, which is why we pride ourselves on a proven 24/7 response from certified service technicians.

## Training

Our training programme is designed to add value to the industry by providing learners with a greater understanding of centrifugal pumps, including pump applications, pump selection, pump design, pump installation and troubleshooting. In this module, our trainers share their accumulated experience using both theoretical and practical training methods.

## Rental

Our short and long term rental fleet consists of a full range submersible draining and dewatering pumps, diesel and electric self-priming pumps, air operated diaphragm pumps, submersible mixers and pump flotation systems. In addition, we also offer installation and monitoring of these installations where necessary.

**WATSON MARLOW Pumps**

Peristaltic Dosing & Metering Pumps

**Bredel** Peristaltic Hose Pumps  
Hose Pumps

**masosine** Process Pumps

Sinusoidal Rotor Process Pumps

**CSFR** Sanitary Centrifugal Pumps

**BARDIANI** Sanitary Process Valves

**OHMAG** Rotary Lobe Pumps

**NETZSCH** Progressive Cavity Pumps & Multi-Screw Pumps

**PIONEER PUMP** Vacuum-Assisted Priming Pumps and Wet-Prime Pumps

**KPUMPS** Horizontal Split-Case Pumps, Axial- & Mixed-Flow Submersible Pumps, and Boiler Feed Pumps

**Goodwin** Heavy Duty Submersible Slurry Pumps

**wilo** Submersible & Immersible Pumps & Package Stations, Horizontal Split Case Pumps, Vertical Multi-Stage Pumps, End-Suction Pumps and Light Duty/ Domestic Pumps

**GRACO** Pneumatic and Electric Diaphragm Pumps, Piston Pumps, and Drum & Bin Unloaders
